NMSurf Phase 1 Fiber Build along Cerillos Road and Siler Road

NMSurf has just completed Phase 1 of its Fiber Build. This Fiber optic line runs from the intersection of 4th Street and Cerillos Road down Cerillos to Siler Road down to Agua Fria Rd. Businesses along this path can connect to the Fiber line.

Connecting to the internet with Optical Fiber is much faster than Cable, DSL and Wireless internet. Fiber internet is the fastest and most reliable internet service available. That's because internet service runs through a dedicated fiber optic cable which offers greater bandwidth to deliver large amounts of data. Fiber internet allows more reliability and more bandwidth with equal upload and download speeds.

NMSurf is your local Internet service provider in Santa Fe for over 22 years, since 1997. NMSurf started off as a dial up internet provider and then DSL. Now we primarily provide Broadband Fixed Wireless and now Fiber to the Premises.

Stay tuned for more phases of our Fiber build rollout in Santa Fe. If you are interested in signing up for Fiber, please give us a call or visit www.nmsurf.com for more information.
